

# ARE YOU COVENANTED? – PART 11

---

## Part 1 – Re-cap & Definition

Covenant - definition: An agreement, usually formal, between two or more persons to do or not do something specified

At its most basic level, a covenant is an oath-bound relationship between two or more parties. Marriage is an example of this relationship. The Creator uses covenants to establish the relationship between Him and His creation.

When the covenant is between Yahweh and mankind, there are conditions attached to that oath on the human side. If the human party involved in a covenant with Yahweh does not keep the covenant's conditions, there are consequences.

There are some covenants that Yahweh makes to strengthen our confidence in His promises. In these cases, Yahweh binds Himself by His own oath to fulfill His promises that He has made.
